PROFILE

As a frontend web developer, I'm passionate about crafting intuitive and visually appealing user interfaces. I'm proficient in UI/UX design and continuously refining my skills while actively exploring additional programming languages to broaden my technical expertise. I'm committed to continuous learning and growth, eager to apply my technical knowledge and creative mindset to contribute to innovative projects and drive exceptional digital experiences.

TECHNICAL SKILLS

UI/UX Design: Figma, Wireframing, Prototyping, Design Systems, Responsive Design, Accessibility, User-Centered Design (UCD), Design Thinking

Frontend Development: HTML, CSS, JavaScript, React.js, Tailwind CSS, Material UI

Programming & Concepts: Python, JavaScript, Object-Oriented Programming (OOP), Data Structures

Tools & Hardware: Git, GitHub, VS Code, SQL (MySQL, SQLite), Circuit Design, Arduino

EXPERIENCE

AWS Cloud Club PUP

Oct 2025 – Present

UI/UX Lead (DWD)

- Led UI/UX design initiatives for the Department of Web Development (DWD), guiding design direction and ensuring consistency across projects
- Designed and prototyped user interfaces using Figma, focusing on usability, accessibility, and visual consistency
- Organized and facilitated multiple Study Jams and workshops, equipping members with practical UI/UX skills and industry insights.

DevTeam Member

- Contributed to the development of club projects, collaborating with team members to build and implement web solutions
- Assisted in translating design concepts into functional features
- Participated in collaborative projects aimed at building real-world applications and improving technical skills

Dewise Solutions Philippines Inc.

Jul 2025 – Sep 2025

Software Engineer Intern

- Designed and prototyped user interfaces in Figma for production-level features, with outputs integrated into real-world applications and presented to international stakeholders
- Implemented frontend components based on design specifications, ensuring alignment between UI/UX design and development workflows
- Iterated on designs through mentor feedback, refining usability, addressing design gaps, and improving overall user experience

DEVCON Philippines

Apr 2025 – Aug 2025

Product Design and Project Management Intern (Part-time)

- Designed Figma mockups for the official DEVCON PH website, including the homepage, SHE IS DEVCON, and Chapters showcase, with outputs later developed and published on the live platform
- Built the DEVCON Plus prototype from scratch, defining user flows and creating a clickable prototype focused on usability and design logic
- Contributed to diverse initiatives including Prompt Engineering for Developers (Heygen AI video), ICP Motoko portfolio setup (dfx, canisters), and exposure to Microbit robotics (DEVCON Kids)
- Coordinated intern deliverables and timelines using Notion, while presenting outputs and supporting project execution across multiple concurrent initiatives

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES (PUP)

Expected Graduation, JULY 2027

Bachelor of Science in Computer Engineering (BSCpE)

- **Related Coursework:** Programming Logic and Design, Object-Oriented Programming, Operating Systems, Data Structures and Algorithms, Computer Hardware Fundamentals, Fundamentals of Electrical Circuits, Computer-Aided Drafting, Logic Circuit and Design, Fundamentals of Mixed Signal and Sensor, Digital and Data Communication.

PROJECTS

DEVCON Plus (Product Design Prototype & Frontend Development)

- Designed and built a full product prototype in Figma for DEVCON Plus, a platform providing global opportunities, curated resources, and community-driven initiatives for Filipino developers
- Created a high-fidelity, clickable prototype focused on usability, navigation clarity, and design consistency aligned with DEVCON branding and ecosystem
- Developed the frontend from the approved designs, translating Figma mockups into functional, responsive interfaces while iterating on design decisions based on mentor feedback and real organizational context

Proyekto (Managed Work Delivery Platform)

- Developed and implemented frontend features for Proyekto, a managed work delivery platform designed to streamline project execution through structured workflows and clear ownership
- Built responsive and scalable user interfaces using React (TanStack), ensuring smooth user experience across core platform features
- Translated complex workflow and milestone-based tracking requirements into intuitive UI components for clients and freelancers
- Collaborated with backend developers to integrate APIs and support real-time collaboration features across the platform

Alertech (Alertong Arduino Hackathon Project)

- Developed Alertech, an integrated fire detection and alert system comprising a mobile app, website, and IoT device.
- Enabled real-time monitoring of temperature, humidity, and smoke levels, providing instant alerts to users and fire authorities.
- Collaborated with four blockmates to design and implement the system during the Alertong Arduino Hackathon.

Arduino Day Website

- Led UI/UX efforts in collaboration with the web development team to create an engaging website for Arduino Day, an international event celebrating Arduino's impact.
- Ensured a user-friendly interface that aligned with the global event's branding and provided key event details.

Sparkfest 2025 Hackathon Website (Google Developer Groups on Campus PUP – GDG PUP)

- Contributed as UI/UX Co-Lead to design and develop the official website for Sparkfest 2025, a week-long hackathon aimed at solving real-world challenges with innovative tech solutions.
- Focused on user experience, accessibility, and interface consistency to enhance participant engagement.
